

Instant Visibility. Threats Averted.

RedSeal Technical Leadership Selected to Speak at MetriCon 2.0

Brian Laing, Mike Lloyd, and Alain Mayer to present methods for measuring operational security risk

REDWOOD SHORES, Calif. - July 23, 2007- RedSeal™ Systems Inc., the leader in innovative Security Risk Management (SRM) solutions, today announced that the company's technology executives have been selected to speak at the 2007 MetriCon 2.0 Workshop hosted by securitymetrics.org. Brian Laing, chief security officer, Mike Lloyd, chief scientist, and Alain Mayer, chief technology officer, will present, "Operational Security Risk Metrics: Definitions, Calculations, and Visualizations" on August 7, 2007 during Track 2 from 11 – 12:30 pm.

"Our objective is to explore the role of metrics in increasing information security," said Brian Laing, chief security officer at Redseal Systems. "We will show how security metrics can provide security professionals with concrete answers and measurable insight into their network security effectiveness."

The goal of MetriCon 2.0 is to stimulate discussion of, and thinking about, security metrics in ways that lead to realistic results of lasting value. Workshop attendance is by invitation only and limited to 60 participants. Other workshop attendees include Fortify, SecurityIncite, WhiteHat Security, and the Yankee Group.

MetriCon 2.0 is co-located with the 16th USENIX Security Symposium in Boston, Massachusetts. For more information about the workshop please visit: <http://www.securitymetrics.org/content/Wiki.jsp?page=MetriCon2.0>

About RedSeal Security Risk Manager (SRM)

RedSeal provides security risk management solutions that give instant visibility into the threats that leave an open door to valuable company resources. RedSeal Security Risk Manager (SRM) **maps** the entire infrastructure, **measures** its relevant risk, and **mitigates** its exposure.

- **Maps:** RedSeal SRM automatically audits your entire network infrastructure including all network resources, security devices and hosts to compile an end-to-end and up-to-date map of these resources and their relationships
- **Measures:** RedSeal SRM pinpoints which assets are exposed then assigns a risk value for meaningful measurement
- **Mitigates:** RedSeal SRM prioritizes vulnerabilities that you need to **find-and-fix** before an exploit so you can mitigate your risk profiles and focus on the most important assets first

About RedSeal Systems

RedSeal Systems Inc. provides security risk management applications that map, measure, and mitigate resource security so security professionals can remediate exposures on enterprise infrastructures before a security breach occurs. Founded in 2004, RedSeal is privately held. For more information, call 888-845-8169, visit www.redseal.net or e-mail sales@redseal.net.
