

DELIVER SECURITY RESULTS— WITH UNPRECEDENTED SPEED

TODAY, SECURITY CONSULTANTS CAN'T BE TOO FAST OR TOO EFFECTIVE. CLIENTS ARE FACING AN ARRAY OF SECURITY CHALLENGES THAT ARE NEVER ENDING. TO DELIVER EFFECTIVE SERVICES, YOU NEED TO QUICKLY UNDERSTAND YOUR CLIENT'S ENVIRONMENT SO YOU CAN IDENTIFY AND ADDRESS SECURITY GAPS.

RedSeal™ Security Risk Manager™ (SRM) offers you a way boost the IT security of your clients' networks—eliminating security threats before they lead to a breach.

RedSeal SRM is a powerful tool you can use in your business.

CONSULTANTS CAN: DELIVER A HIGHER QUALITY PRODUCT—FASTER

Find-and-Fix IT Security Exposures

With RedSeal SRM, it's possible to find-and-fix IT security exposures quickly and easily. RedSeal SRM gives you a powerful tool to:

- Visualize and quantify business risk
- Prioritize actions based on risk exposure

Save Time and Speed Service

RedSeal SRM automates many manual processes and speeds your ability to make an impact on your client's security posture.

- Shave days or weeks off of audits and remediation plans

Make—and Demonstrate—an Impact on your Client's Security Posture

Through concrete security metrics and robust reporting you'll have:

- Evidence that your services have made a difference to your clients
- Pinpoints the resources at greatest risk and how to fix them
- More opportunities for future engagements

Provide New Services that Win Sales and Deepen Account Penetration

With RedSeal SRM you can add new services to your portfolio, or enhance current services. With RedSeal you can offer these services:

- Fast firewall and router audits
- Security remediation planning
- Remediation execution

Instant Visibility. Threats Averted.

About RedSeal Systems

RedSeal Inc. provides security risk management solutions that give instant visibility into the threats that leave an open door to valuable company resources.

Evaluate in Your Environment

It only takes 30 minutes to go through an introductory evaluation. Using data from your systems you can see for yourself how RedSeal SRM can help your IT security team identify the most critical vulnerabilities.
