

DO YOU HAVE VISIBILITY THAT YOUR MOST CRITICAL ASSETS ARE SECURE?

IF YOU ARE LIKE OTHER IT SECURITY EXEC'S, YOU MAY NOT GET THE KIND OF VISIBILITY INTO YOUR SECURITY RISK POSTURE THAT YOU REQUIRE. DOES YOUR IT SECURITY STAFF OR TECHNOLOGY PROVIDE YOU WITH PROOF THAT YOUR MOST CRITICAL ASSETS ARE SECURE?

RedSeal™ Security Risk Manager™

RedSeal™ Security Risk Manager™ (SRM) provides instant visibility for shutting down IT security risk exposures. It automatically audits and prioritizes the exposures that could leave an open door to valuable company resources. In addition, RedSeal SRM allows you to lower compliance costs by identifying vulnerabilities that should be addressed, before the auditors find them.

RedSeal SRM maps the entire infrastructure, measures its relevant risk, and mitigates its exposure.

- Maps: RedSeal SRM automatically audits your entire network infrastructure including all network resources, security devices and hosts to compile an end-to-end and up-to-date map of these resources and their relationships
- Measures: RedSeal SRM pinpoints which assets are exposed then assigns a risk value for meaningful measurement
- Mitigates: RedSeal SRM prioritizes vulnerabilities that you need to find-and-fix before an exploit so you can mitigate your risk profiles and focus on the most important assets first

Key Benefits

- Visibility into your security risk posture- Instantly view your security risk across your entire infrastructure
- Proof that your most critical assets are secure- Identify if exposures exist on critical systems and understand their relative priority.
- Lower compliance costs-fix problems before auditors find them, get through audits faster.

SC Magazine thoroughly reviewed RedSeal SRM in January 2007, deeming it "highly recommended" and "...the first solution we have seen that truly understands IT risk and presents it in an extremely useful manner, both to IT and security teams.

Instant Visibility. Threats Averted.

About RedSeal Systems

RedSeal Inc. provides security risk management solutions that give instant visibility into the threats that leave an open door to valuable company resources.

Evaluate in Your Environment

It only takes 30 minutes to go through an introductory evaluation. Using data from your systems you can see for yourself how RedSeal SRM can help your IT security team identify the most critical vulnerabilities.
