

# RedSeal: The ideal solution for proactive cybersecurity

With Skybox shutting down and moving you to Tufin, you may be losing critical features like vulnerability management (VM) and attack surface management (ASM). Only RedSeal fills these gaps and goes beyond, offering enhanced capabilities that outperform both Tufin and Skybox.

## **Wondering what you've been missing? Only RedSeal can:**

- Identify and prioritize attack vectors to manage risk more effectively
- Map your entire hybrid environment to eliminate blind spots and increase visibility
- Enhance vulnerability remediation and accelerate incident response
- Ensure ongoing compliance to stay ahead of emerging threats

RedSeal's intuitive interface and comprehensive features provide a seamless upgrade for Skybox customers, empowering you with the tools you need to strengthen your security posture and manage risk.

## **MAKE THE SWITCH TODAY**

*A seamless transition, no investment lost.*

If you have a Skybox subscription or perpetual license with 6 months or less remaining, RedSeal will cover the cost of your remaining term when you transition to a RedSeal subscription.

Stay secure, avoid disruptions, and seamlessly migrate.

Don't wait—**contact** RedSeal today.

Maintain and enhance your security posture post-Skybox: Let’s explore.

Capability	 REDSEAL	 SKYBOX SECURITY	 tufin
